

JUNRIEL T. PAJAL

AI Automation Specialist | Front-end Developer | GoHighLevel Specialist

Butuan City ADN, Philippines | 0994-508-4712 | junrielpajal8@gmail.com

Portfolio: <https://zesty-melomakarona-98148f.netlify.app/> | <https://www.linkedin.com/in/junriel-pajal-0b4a1>

PROFESSIONAL SUMMARY

Detail-oriented Technical Virtual Assistant specializing in AI-powered automation, CRM systems, and workflow optimization. Experienced in building structured systems and managing databases, with a proven track record of streamlining processes and improving efficiency through technology. Junriel has engineered full-cycle appointment booking workflows, managed over 5,793 contacts, and developed lead lifecycle automations that integrate task creation, email sequences, and follow-up scheduling. Expertise includes building AI-powered lead qualification systems, content repurposing workflows, and AI chatbots for platforms like Facebook Messenger. Proficient in tools such as GoHighLevel, Zapier, n8n, and skilled in web development with Python Flask, PHP, HTML, CSS, JavaScript, and MySQL.

EDUCATION

BS Information Technology ACLC College of Butuan

2022 – 2026

CORE SKILLS

Automation: AI & Automation (Zapier, n8n, GoHighLevel)

CRM: GoHighLevel (Expert), Pipelines, Funnels, Email/SMS Automation

Technical: REST APIs, JSON, Webhooks, OAuth, JavaScript, Python

Web Development: React, PHP, HTML, CSS, MySQL, Tailwind, Vite

Integrations: Twilio, BoldSign, Google Drive API, Microsoft Outlook Calendar

CERTIFICATES

- Cybersecurity Training (2023)
- GoHighLevel CRM (2025)
- No Code Automation with Zapier
- AI Automation with n8n

EXPERIENCE

Booking Appointment & Reminder Automation System

Platform: GoHighLevel

Category: Automation & CRM

Description:

Designed and implemented a full-cycle appointment booking automation managing 5,793+ contacts, integrating CRM updates, booking confirmations, and automated follow-ups to streamline client scheduling. Configured multi-channel email and SMS reminder sequences with 24-hour and 1-hour triggers to ensure timely communication before appointments. Reduced missed appointments, eliminated manual CRM updates, and improved overall client engagement and operational efficiency.

Asana CRM Lead Engagement Workflow

Platform: Zapier

Category: CRM Automation & Lead Management

Description:

Developed an end-to-end lead engagement workflow using Zapier to automate Asana task creation, personalized email campaigns, quote reminders, and follow-up scheduling across the sales pipeline. Integrated CRM processes to centralize lead management and eliminate repetitive manual handoffs between teams. Improved lead response times, increased communication consistency, and created a more organized and trackable sales workflow.

AI Lead Qualifier Automation

Platform: n8n

Category: AI-Powered Workflow Automation

Description:

Built an AI-powered lead qualification workflow using n8n that automatically evaluated incoming leads through intelligent scoring logic, smart routing, and structured decision-making. Integrated Google Sheets logging to maintain an auditable pipeline and support data-driven sales processes. Reduced manual lead evaluation, improved qualification accuracy, and enabled sales teams to prioritize high-value prospects more efficiently.

Content Repurposing Workflow

Platform: Zapier Automation

Description:

Developed an end-to-end content repurposing workflow that automatically transformed uploaded video and audio files into AI-generated transcripts, blog articles, and social media content. Integrated Google Drive, conditional logic, Facebook publishing, and Google Sheets logging to automate the entire content production pipeline. Significantly reduced manual content creation time while improving publishing consistency and workflow efficiency.

Technologies: Zapier, AI Automation, Google Sheets

AI Chatbot for Facebook Messenger

Platform: n8n Automation

Description:

Engineered a self-hosted AI chatbot that automatically responded to Facebook Messenger inquiries using Google Gemini, a custom knowledge base, and conversation memory for context-aware interactions. Integrated Facebook Graph API webhooks to enable real-time messaging and automated customer support. Improved response speed,

delivered consistent customer assistance, and reduced manual support workload.

Technologies: n8n, Google Gemini, Facebook Graph API, Webhooks, AI Chatbot

Simple Retell Call Logger

Platform: n8n Automation

Description:

Built an automated call logging workflow that captured Retell AI call details, transcripts, recordings, sentiment analysis, and call status before synchronizing the data into Google Sheets. Designed the workflow to centralize call records and simplify performance monitoring. Eliminated manual logging, improved reporting accuracy, and enabled faster analysis of customer interactions.

Technologies: n8n, Retell AI, Google Sheets, Voice AI, Workflow Automation

Smart Lead Routing for Real Estate

Platform: GoHighLevel Automation

Description:

Designed an intelligent lead routing system for a real estate business that automatically qualified survey submissions, tagged contacts, created CRM opportunities, synchronized data with KvCore via webhooks, and triggered personalized follow-up sequences. Accelerated lead processing, reduced manual CRM management, and improved follow-up efficiency for buyer and seller inquiries.

Technologies: GoHighLevel, CRM Automation, KvCore, Webhooks, Real Estate

IPCR Management System

Platform: Web Development

Description:

Developed a web-based IPCR Management System that digitized employee performance planning, evaluation, automated rating calculations, narrative assessments, and printable report generation. Designed the application to streamline performance management workflows and improve data accuracy. Reduced administrative workload, minimized manual computation errors, and increased efficiency in employee performance evaluations.

Technologies: PHP, MySQL, HTML, CSS, JavaScript, Performance Management
